### **The normal development of voice in childhood**

Mette Pedersen

**Institution:** The medical centre ENT & voice unit

**State:** DENMARK

**Area:** LARYNGOLOGY AND BRONCHO-OESOPHOLOGY

**Presentation Form:** INSTRUCTIONAL COURSE

**Date:** 06-04-2009

**Time:** 16:30:00

**Room:** ROOM 02

The normal development of the child voice is elucidated. Voice analysis with fundamental frequency measured with electroglottography is compared with phonetograms. The change of the voice parameters during development of girls and boys is compared with their hormonal development and the pediatrics parameters. ref. Mette Pedersen, MD. The normal development of voice in childhood. Publisher: Springer.com
